Bright Eyes Mission

To be a source of support, trust, education, awareness and advocacy for the plight of visually impaired children in our community.

To provide the best possible levels of care, early intervention, inspired education and nurtured support to all visually impaired young children in our community, regardless of financial ,cultural or social standings. To offer the highly effective and essentially integral intervention that these visually impaired children need at a very crucial and highly effective age in their lives so's to increase their possibilities of truly bright, fully balanced futures. Futures in which their visual impairments are not seen as hindrances but rather as tools for becoming more able, more confident, more self empowered, more highly skilled and more capable then first believed possible.
